Answers To Ecological Pyramids

Ecological Pyramids How does energy flow through an ecosystem? Every organism in an ecosystem is either eating or being eaten. When cows eat grass, they obtain some of the energy that the grass transferred from the sunlight it absorbed. If cows could carry out photosynthesis, would they have access to more energy than they get as herbivores?

Ecological Pyramids - Ms. Tara Davis

An ecological energy pyramid is a pyramid that demonstrates the energy levels at each trophic level. The base of the pyramid is largest, and the organisms at the base of the pyramid are most common.
